Drive Engagement with My League Online (MyLO)

Info at lwvc.org/mylo
What Is MyLO?
A tool for Leagues across the nation

A framework built on Drupal that enables State and Local Leagues to quickly set up a website with key information, shared content, consistent branding, and more, without having to worry about hosting and security.
Out of the box content with advanced features

- A brand new site contains default content right away, without any effort
- Featured slideshow on the home page
- Shared content from LWVUS and State LWVs
- Webforms
- Members Only section
- Media Library
The Media Library
a shared resource

A tool for webmasters to share and find images, PDFs, and much more that are approved for use.
MyLO brings League content together

- Subscribe to content from other Leagues

- Content tagged with official Issues of Focus so that all content related to one issue can display together

- Each piece of content exists once in a database, so when updated, changes reflect everywhere immediately

- RSS feeds are available for content syndication
Looking ahead:
MyLO is a solution that grows with us

- Ongoing feature development is driven by the community of MyLO Webmasters, and their requests
- MyLO content is database driven
- As more Leagues come online, LWVC will have more resources available to further enhance MyLO
- MyLO is more than a solution: it is a community of Webmasters who engage with each other with ongoing education offerings and peer support
You drive change!

As a MyLO Webmaster, if you need a feature that doesn’t exist, ask for it!

We continue to build the system, and our priorities are driven by the Webmasters themselves.

NEW! Added menu and color designs came from your feedback!
What you get when you sign up for MyLO

- Pre-built customizable site
- Access to the Media Library

Access to support:
- Google group (the Webmaster community!)
- Ticketing system
- Live calling
- “Office Hour” webinars, monthly

Continual upgrades and enhancements
- Continual security updates & monitoring
- Backups & server maintenance
- Support for traffic spikes around elections
